My Presentation

My Presentation : a test actually

author : Arnaud Lelièvre

date : Tue 02 Jun 2026

Intro

- some frames

1.1-1 : Welcome

Hello, welcome to coding in **ImGoaTeX**!

1.1-2 : Welcome

Hello, welcome to coding in **ImGoaTeX**!

Here I used a pause command to make a Beamer-like animation that simply copies a frame

Have fun using **ImGoaTex** !

tests of features

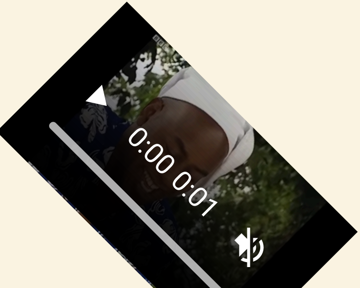
- medias
- tests du texte
- tests des equation
- test de iframe

2.1-1 : Video, with a size=1

2.1-2 : Video, with a size=1

some text, the align is top-right

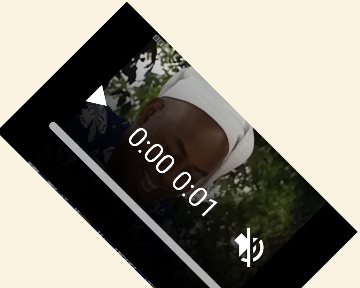
the image is shifted to 20 **y-paging units** to the top !



2.1-3 : Video, with a size=1

some text, the align is top-right

the image is shifted to 20 **y-paging units** to the top !

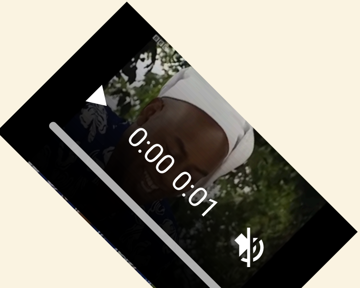


2.1-4 : Video, with a size=1

some text, the align is top-right

the image is shifted to 20 **y-paging units** to the top !

SOME MORE TEXT AGAIN



2.1-5 : images

with no arguments

ceci est un test

2.1-6 : images

with no arguments

ceci est un test

ImGoaTeX

some text inside the text box

2.1-7 : images

with no arguments

ceci est un test

test de ouf encore

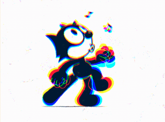
ImGoaTeX

some text inside the text box

2.1-8 : images

with a size=2, right-top, with a subtitle

some text, the image will be inline :



2.1-9 : images

with a size=2, right-top, with a subtitle

some text, the image will be inline :

ImGoaTeX

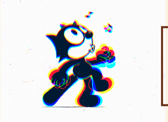
some text inside the text box

2.1-10 : images

with a size=2, right-top, with a subtitle

some text, the image will be inline :

some more text



some text inside the text box

2.1-11 : images with a size=2, left-bottom, with no subtitle

2.1-12 : images with a size=2, right-bottom

2.1-13 : image size=3

here is an image of size 3

here is some text that is written after the image

2.2-1 : tests du texte

Test, italic avec les etoiles

test du double backslash

test du backsash n

- **test**
  - sous-tiret

2.3-1 : tests equations

Intégrale gaussienne : $\int_{-\infty}^{+\infty} e^{-x^2} dx = \sqrt{\pi}$

Intégrale gaussienne double signe dollard :

$$\int_{-\infty}^{+\infty} e^{-x^2} dx = \sqrt{\pi}$$

2.4-1 : tests iframe

2.4-2 : test codeblock

```
dictionnary = [i for i in range(10)]
```

```
def fib(n):
    if n==0:
        return 1
    if n==1:
        return 1
    else:
        return(fib(n-1) + fib(n-2))
```
