

My Presentation

My Presentation : a test actually

author : Arnaud Lelièvre

date : Tue 02 Jun 2026

1) Intro

1.1) some frames

2) tests of features

2.1) medias

2.2) tests du texte

2.3) tests des equation

2.4) test de iframe

Intro

- some frames

Hello, welcome to coding in **ImGoaTeX**!

Hello, welcome to coding in **ImGoaTeX**!

Here I used a pause command to make a Beamer-like animation that simply copies a frame

4

Have fun using **ImGoaTeX** !

tests of features

- medias
- tests du texte
- tests des equation
- test de iframe

2.1-2 : Video, with a size=1

7

some text, the align is top-right

the image is shifted to 20 **y-paging units** to the top !

7

some text, the align is top-right

the image is shifted to 20 **y-paging units** to the top !

some text, the align is top-right

the image is shifted to 20 **y-paging units** to the top !

SOME MORE TEXT AGAIN

with no arguments

ceci est un test

with no arguments

ceci est un test

some text inside the text box

with no arguments

ceci est un test

test de ouf encore

some text inside the text box

2.1-8 : images

13

with a size=2, right-top, with a subtitle

some text, the image will be inline :

13

2.1-9 : images

14

with a size=2, right-top, with a subtitle

some text, the image will be inline :

14

some text inside the text box

2.1-10 : images

15

with a size=2, right-top, with a subtitle

some text, the image will be inline :

some more text

15

some text inside the text box

here is an image of size 3

here is some text that is written after the image

Test, italic avec les etoiles

test du double backslash

test du backsash n

- **test**

- sous-tiret

Intégrale gaussienne : $\int_{-\infty}^{+\infty} e^{-x^2} dx = \sqrt{\pi}$

Intégrale gaussienne double signe dollar :

$$\int_{-\infty}^{+\infty} e^{-x^2} dx = \sqrt{\pi}$$

```
dictionary = [i for i in range(10)]
```

```
def fib(n):  
    if n==0:  
        return 1  
    if n==1:  
        return 1  
    else:  
        return(fib(n-1) + fib(n-2))
```
